

How to save Graphics Files from the Web

On a Macintosh:

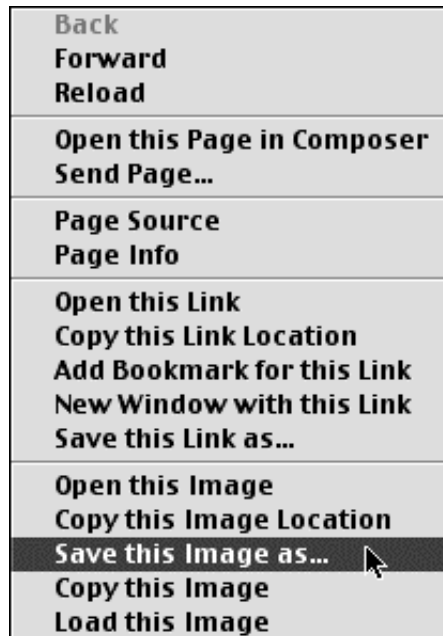

Start Netscape Navigator and go to a Web page with the picture that you want to copy:

Put the cursor over the image that you would like to copy:

Hold down the mouse button, and this window will pop up.

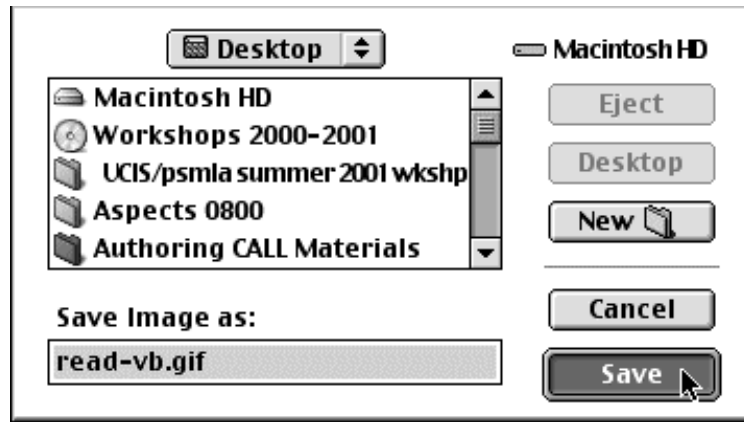

Select
Save this Image as ...

Be sure to specify where you want the image file to be saved.

You may change the file name before saving if you like.

Click on Save.

On a PC:

Start Netscape Navigator and go to a Web page with the picture that you want to copy:

Put the cursor over the image that you would like to copy:

Hold down the right mouse button, and this window will pop up.

Select
Save this Image as
...

Be sure to specify where you want the image file to be saved.

You may change the file name before saving if you like.

Click on Save.
