

How to Publish Your Web Page on the Pitt Webspaces with Fetch for Macintosh

Double-click on Fetch to start the program.

| | |
|---|--|
| <p>Under "Host:" type unixs.cis.pitt.edu</p> <p>Type in your Pitt user ID and password:</p> |  |
|---|--|

2. Double-click to open the "public" folder
 3. Create an "html" folder inside the public folder
(To do this, create a folder on your hard drive. Name it "html."
From the "Remote" menu in Fetch, Select "Put folders and files."
Click on "Add" and then "Done.")
 4. Your home page should be named "index.html." It should be inside your "html" folder.
- To upload the index page to the html folder on the server:
1. Double-click so that you are inside the html folder on the server.
 2. Click on "Put."
 3. Select the index file from your hard drive.
 4. Click on "Open."
 5. Click "OK."

To see your Web page, use this URL:

<http://www.pitt.edu/~yourusername>

"yourusername" is the part of your Pitt email address that immediately before the @ sign.
